EDUCATION

Silicon University <i>B.Tech, Computer Science and Engineering - CGPA - 8.84</i>	Bhubaneswar, India 2021 - 2025
DAV Public School <i>Class-12 -Percentage -92.3</i>	Gumla, India 2019 - 2021
Notre Dame School <i>Class-10 -Percentage -93.3</i>	Gumla, India 2019

TECHNICAL SKILLS

Languages : C++,JavaScript, Python, C
WebDev Tools : HTML5, CSS3, React.js, Tailwind CSS, ReduxToolkit
Developer Tools : Git, GitHub, Visual Studio, Linux
Database : MySQL

PROJECTS

FoodWallah | *React.js, Tailwind CSS, ReduxToolkit, JavaScript, Swiggy API* | [GitHub](#)

- Built a food ordering application using **React JS** for the frontend, styled with **Tailwind CSS**, and bundled with Parcel. Utilized **Redux Toolkit** for state management.
- Integrated **Swiggy API** to fetch real-time restaurant data displaying detailed information including area name, cuisine categories, and ratings.
- Implemented functionalities to search for restaurants by name, view detailed menus with various dishes, including prices and descriptions, and add items to a **shopping cart**.
- Ensured a fully **responsive** interface across devices, with a live contact form feature for user inquiries and support

Techno-Bazaar | *HTML, CSS, JS* | [Live Link](#)

- Built using **HTML, CSS, JavaScript**, product.json file as a dummy API to fetch product data dynamically.
- Developed an interactive **shopping cart** where users can add, increase, decrease, and remove products, with real-time updates to product quantities and total price calculations.
- Implemented a functional contact page to handle user inquiries and feedback effectively.

Blogram (Personal-Blog Page) | *React.js, Material-Tailwind, Tailwind CSS, Firebase* | [Live Link](#)

- Developed a personal blog page using **React** and styled with **Material Tailwind**, ensuring a visually appealing and fully responsive design with Dark/light mode.
- users can read blogs and share their thoughts through comments by clicking on Blog, while providing admins with a secure dashboard for creating and deleting blog posts.
- Integrated **Firebase** for efficient data storage and user authentication, ensuring seamless user interactions and secure access control for admin functionalities.

CERTIFICATION

Full Stack Developer — Intern

Jul 2023 - Aug 2023

Preplabs, Bhubaneswar

- Completed a MERN stack internship, gained Knowledge in WebDev Tools.
- Built a team Project "**B-Donate**" (HTML/CSS/JS) and a Pepperfry clone "**Homeify**" using the MERN stack,.

ACHIEVEMENTS

1st Runners Up in Trithon Hackathon

Solved Over 150+ Problems on Coding Platforms , [@himanshuKr7](#)
